Since 2017, all our clients information is being maintained on our custom AGENCY ERP. This has considerably increased our productivity while ensuring we meet our client's KPIs

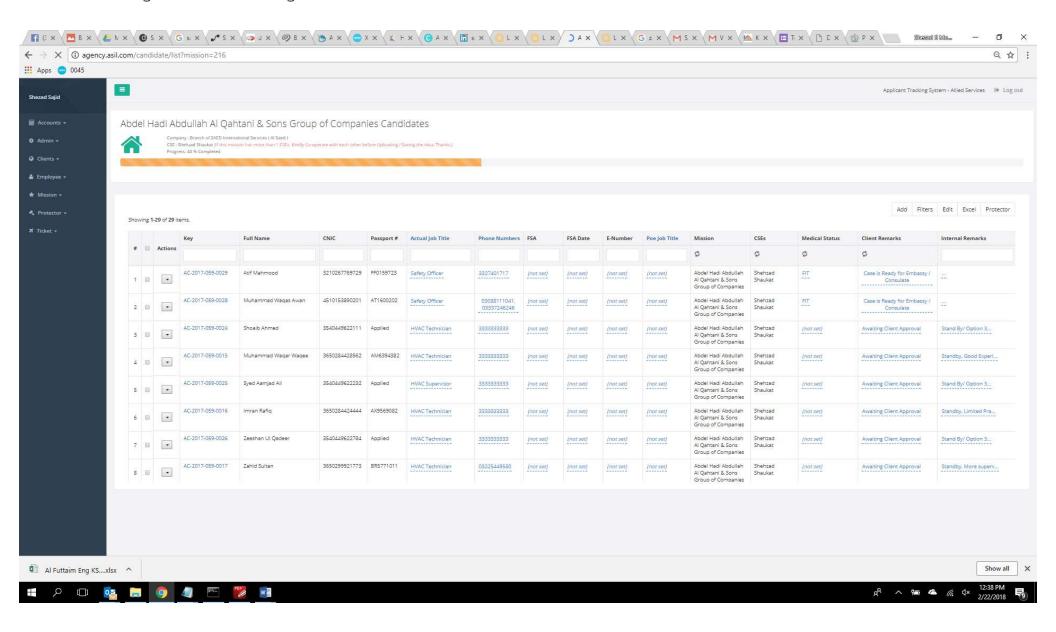

The agreements (contracts) with our clients are entered online in the system and all our branch offices and team/s have access to the terms and conditions in the contract. There are no deviations.

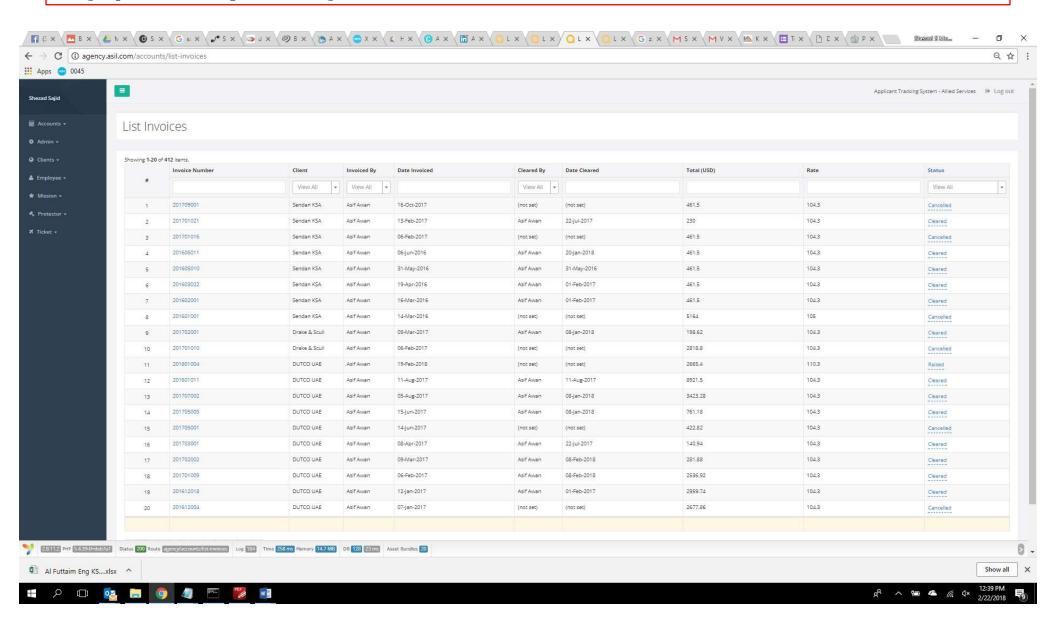

The client dashboard enables us to view an overview of the assignments done in the last year as well as the status of the job orders.

This is the information of candidates hired by the client and their current status. Candidates are sent autogenerated SMSs updating them. All Embassy / POE documentation is printed through the system minimizing time consuming tasks.

Invoices are raised and tracked through the system using the contract details entered and the category of the manpower being hired.

Tickets are issued and tracked through the same system. Ticket cost approvals are taken from clients if any tickets are booked by us and invoices are autogenerated to the clients.
